Since our last issue, we note the arrivals of the Ethan Allen, Comet and Idaho from San Prancisco, all bringing more or less mail matter : the latest dates from San Francisco are of the 17th lest

The above vessels bring full cargoes of merchardier, and will for a time, leave our market somewhat overstocked, especially as the whalers are mostly provided for, and trade for the coming few months will be rather slack. Our latest dates from San Francisco report

the market for Island sugars dull, except for the best grader, which were in some demand, at prices ranging from 113 to 124 for choice; moineses unsaleable at any price. Pulu, sales at So: Konn coffee, sales of some round lots of superior old Konn at 184e; small parcels of inferior green at 17 to 174c.

We have had unusually stormy weather for the past three or four weeks; our coasting flert have been compelled to lay up the greater part of the time, and although the plantsas are nearly all at work grinding, but little of the new crop has come forward.

The Idaho, Ethan Allen and Comet, will all take full cargoes for San Francisco. The Cambridge will lead for Portland, and the Byzantium for Victoria.

From our San Francisco correspondent, we receive the following, under date of the 17th Instant: The bark Comet met with unusual desnatch, having arrived on the 8th lust, discharged and took in freight, and sailed ag-in on the 19th, lying in port only three days. She carried a cargo valued at \$11,209, and \$5,000 in treasure. She ought to arrive at your port with the steamer. Our market show no unimation in any department of trade The stock of Hawaiian sugars, however, are being gradually reduced from first hands, a prices ranging from 8 6 12c. Rice continue a drug in the market. Small sales of pul have taken place at 2c. Kona coffee is quotable at 17c. Gold continues to fall, the rate business must be affected disastrously all over Donors. Salutes were fired on both occasions.

The case of the United States vs. 12,347 bags of sugar, has been decided in the U. District Court adversely to the defendants. is sill rmed that the case will be appealed to a higher Court; and it is also said "that the jurisdiction of Judge Hoffman will be called in question, on the ground that he was appointed under the title of 'Judge of the United States District Court for the Northern District of California, and that legally, no such Court California, and that legally, no such Court press their thanks to the Omeers of H. I. R. now axists." It is ear opinion "that sock won't fight." The fact of blending the Northern and Southern Districts into one, and contering the jurisdiction in the Northern District, does not make the preciding Judge any the less Judge of the Northern District. It conty maintains his former jurisdiction, with the addition of the Southern District, but deprives him of no part of his jurisdiction; it was been tendered the appointment of Consul for Austria at this port, by H. Schr Kamel, for following statement to the public: The sum named has been at interest many years, the ncome from it (one hundred and eighty dolars per annum.) having been expended from time to time for benevolent objects. It was the urgent request of Rev. Mr. and Mrs. Damon, who have been the most efficient and constant friends of the Society, when leaving for the United States, that this fund be preserved unbroken, as the surest means to secure the permanency and efficiency of the organization. Notwithstanding this, it bas been broken into several times, when the immediate necessities of strangers required relief, but has on each occasion, been made whole by special efforts among the members of the Society. And it is held ready to be expended, in part or in whole, whenever the wants of charity demand it. Only in this way can the Society carry out the objects of its organization, without constantly appearing before the public, and seeking aid. Such a fund is possessed by nearly every benevo-lent society in Honolulu, and in every such

instance adds to its efficiency.

THE GALE.-The gale which commence on Thursday evening last, and blew with great fury during that night and Friday, was the most severe that has occurred here within the memory of that venerable personsge, "the oldest inhabitant." Fortunately, the shipping in the harbor received no material damage, though there was bardly a ship but which dragged her moorings. During Thursday night, H. I. R. A. M's ship Donas drifted on to the mud bank at the lee side of the harbor, although she had shead, a heavy anchor and seventy fathoms of chain. The brig Kokola drifted slongside of the new bullock wharf; the Lorenzo, though supposed to be seenrely moored, dragged so as to present, in the orning, her broadside to the town, instead of her bow as before; the back Cambridge, which vessel had been moored to the Can Buoy in the harbor, drifted to leeward, taking the buoy with her some twenty or thirty changed, more or less. There is no doubt that if our harbor had been as full of shipping as it was a few weeks ago, the damage would have been most serious. Among the incidents of the night, was the adventures of three of our citizens, who, feeling anxious for the safety of some ver-sels lying in the barbor, in which they were interested, went on board to see if the "ground tacklings" were all right. After satisfying themselves in this regard, they entered their boats with the intention of returning on shore. They found, however, that it impossible for the boat boys to make headway against the violent wind, and were obliged, rejuctantly, to seek shelter on

their families and friends would be anxious for their asfety. The consters which were so unfortunate as to be at sea during the gale, (widels hasted ouril Satarday) suffered considerably. The Moi, bound for Kutmini, being at the time in the Molekal chanet, had her jib spilt, and was obliged to return to port; the Kate Loc, on the passage from Hilo, tost her jibboom; the Nette Mervill, on the passage from Labains, sprang her mainmast, (shout hell was up from the deck to the chop) so badly that it will have to be replaced by a new one; the sedooner Pary Queen, from Hansiel, after nearly reaching the month of the harbor on Friday, had berjib and mainsail spilts, and was obliged to seek shelter under the lee end of the Island. She arrrived in port on Starday. We have formed the month of the harbor on Friday, had berjib and mainsail spilts, and was obliged to seek shelter under the lee end of the Island. She arrrived in port on Starday. We hear of one or two cottages having been blown down in town. The trees suffered considerably, and in some instances flower gardens and shrubery were damaged to some extent.

Congress met on the 6th at noon, and

on it as follows:

The Herald says Grant's Message is that of an honest, clear-headed, practical man. In the reconstruction business, he simply looks to the execution of the laws. His plea for funding the debt and a gradual return to specie payments will meet the general approbation of the country. It considers the Message non-committal on Cuban affairs.

The Times says the Message is one of good news throughout.

The World says this is the weakest Message ever sent to Congress by a President, and considers that the Message settles the question of the Cuban insurrection against the patriots. On financial affairs it is too Quixolle and chimerical for serious considers

The Tribune regards the Message as the wisest and most indicious ever transmitted to Congress and predicts its hearty approval by the American people.

The Message has a decided tone upon the questions considered, that leaves no doubt as to the policy of the administration. The following relates to reciprocity:

The reciprocity between the United States and the British Provinces on this continent has not been favorably considered by the administration. The advantage of such a treaty would be wholly in favor of the treaty would be wholly in favor of the British producer, except possibly a few engaged in the trade between the two sections.

No citizen of the United States would be benefitted by reciprecity. Our internal taxation would prove a protection to the British producer almost equal to the protection which our manufacturers now receive from the tariff. Some arrangements for the regulation of commercial intercourse between the United States and the Dominion of Camada may be desirable.

Pants, November 29.—The session of the Senate and the Corps Legislatif was opened with great ceremony by the Emperor, who delivered the opening speech from the throne. It was hoped that the Empress might return in time to take part, but she has not yet reached Paris. The Emperor said: "It is not easy to establish regular and pesceful liberty in France. For moaths past, society seemed to be meanced with subversion by passions, and freedom to be compromised by the excesses of the press and of publicassemblages. But common sense has already properly judged these culpable ctaggerations, which, after all, served but to prove the solidity of the editive founded by popular suffrage, but this uncertainty and trouble must be made known.
